

## High-Precision Nonmital Laser Cutting Machine

- 1. CT series adopts International DSP Independent computer operation technology, USB interface, support U disk, USB, network cable three transmission modes.
- 2. Precision guideway to ensure that the equipment running accurately, the industry leading continuos, fast curve cutting function and the shortest processing path optimization function, greatly improve the working efficiency; stable voltage constant-current laser power supply module, extent the life of laser tube.
- 3. The latest software provides seamless docking with AutoCAD, Coreldraw and other design software, direct original image output function, support for any variety of colors, arbitrary definition of cutting or carving order, easy to achieve all or part of the graphics output at one time.

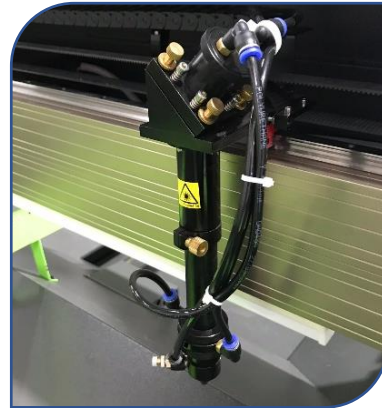

### Laser Head

Light path deviation small stability, easy to adjust

### Stepper motor

Long service life and high accuracy

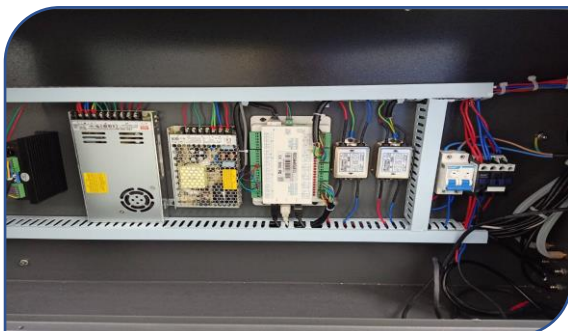

### The control panel

The control panel controls the operation of the machine and can adjust the power according to the material and expected effect.

### CO2 laser tube

1.5 layer structure design to ensure that the laser tube under the condition of 50-60 °C water temperature stability of the power output

2.The cathode design and dustproof design can effectively guarantee the long life of the product in variety of environments

### France Schneider Electric

Use France Schneider Electric to make sure the machine has high stability and control can be adjusted, open electric cabinet with open function to cut off the

# PARAMETERS

Model	GH-1309	GH-1325	GH-1530
Laser power	150W/180W/260W		
Processing format	1300x900mm	1300x2500mm	1500x3000mm
Operating system	Independent control system		
Transmission form	High speed linear guideway		
Cooling-down method	Industrial constant temperature water cooling		
Output interface	USB		
Software Supported	ArtCut, CorelDraw, PhotoShop, AutoCAD		
Graphic Format Supported	PLT, DXF, BMP, JPG, GIF, PNG, TIF,AI		
Working voltage	220V/50Hz		
Driving system	Rasay stepping motor drive package		

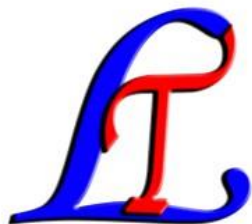

Can cut, drill, grind, engrave non-metallic materials such as

Acrylic, Crystal, Glass, Leather, MDF, Paper, Plastic, Plexiglax, Wood, Rubber etc.
